Portfolio

Product Designer with a background in **UI Design** and **UX Research**, focused on turning user insights into clear, practical product experiences.

Experience

Apr 2025 — Sep 2025

Product Designer

Kave Negar Messaging Platform Provider

- **Developed a heuristic-based UX audit framework** and applied it across key product areas, **helping the team systematically identify, prioritize, and document usability issues.**
- Mapped and analyzed the platform's information architecture, benchmarked industry patterns, and **proposed navigation improvements to address structural inconsistencies and improve discoverability.**
- Collaborated with support and sales teams to investigate ticketing workflows, analyzed real customer tickets to **uncover categorization issues, and informed improvements to the support experience.**

Nov 2024 — Mar 2025

UX Researcher

Aban Tether Cryptocurrency Exchange

- Investigated dashboard usage patterns through competitive analysis, behavioral analytics, and user segmentation, **providing data-driven recommendations** for content prioritization and navigation structure.
- Combined industry benchmarking with user surveys to evaluate cryptocurrency listing features, **uncovering opportunities to improve information hierarchy** and feature discoverability.
- Investigated user friction in a newly introduced deposit flow through support-ticket analysis, stakeholder interviews, and GA4 path exploration, **informing a redesigned deposit experience.**

Nov 2021 — Jun 2022

UI Designer

Manzoomeh Negaran Digital Marketing Agency

- **Designed end-to-end website experiences** for clients across multiple industries, translating business
- **Created interactive prototypes and complete design specifications** to support developer handoff and streamline implementation.

Selected Projects

Product Designer

Zeero Shared Electric Mobility Service

- Conducted field interviews with riders and synthesized research findings into three prioritized problem areas, **helping narrow the project focus to the most common user frustrations.**
- Explored and refined solution ideas through collaborative ideation and wireframing, **translating research findings into tangible design concepts.**
